

COMMISSION WITH EXTO

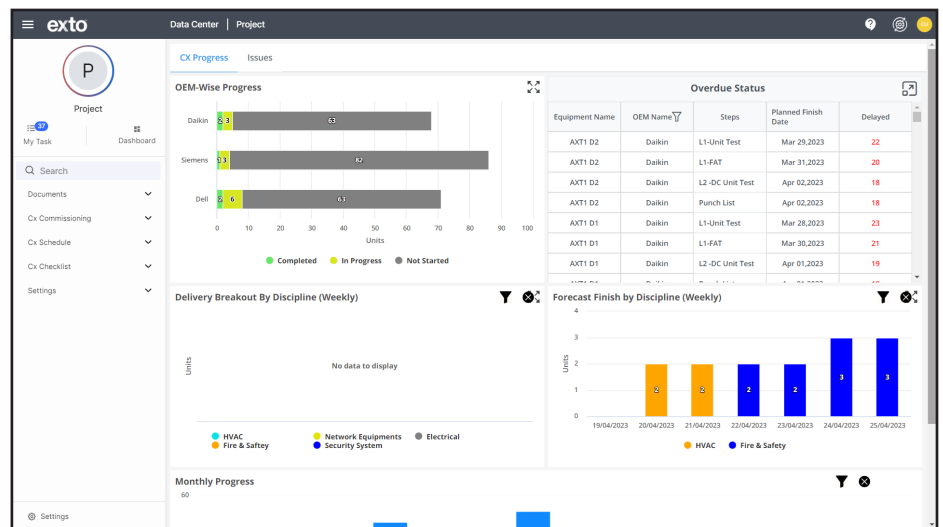

Configure, customize, and manage all commissioning processes

Exto is a SaaS work-management platform created to simplify complex projects.

Exto's engineers understand commissioning needs and designed a solution specifically to facilitate commissioning project management, planning, and execution.

Leverage Exto features for commissioning

- View all commissioning projects across multiple teams in real time
- Use a single platform to identify and collaborate on issues
- Configure flows that assign work directly to appropriate stakeholders
- View status of all equipment
- Integrate directly with project schedules to adapt to planning changes
- Access equipment lists, checklists, documents, and photos instantly
- Customize layouts to create a commissioning project dashboard to suit specific organization processes

Exto project dashboard displaying Cx progress and status

The 'Exto Cx' portal displays a detailed commissioning schedule table. The table includes columns for NAME, ITEM MASTER, ISSUES (OPEN/TOTAL), DEPENDENCY (OPEN/TOTAL), and steps from STEP-1 to STEP-7. The schedule is organized by equipment type: AHU, Chiller, and Cooling Tower.

NAME	ITEM MASTER	ISSUES (OPEN/TOTAL)	DEPENDENCY (OPEN/TOTAL)	STEP-1	STEP-2	STEP-3	STEP-4	STEP-5	STEP-6	STEP-7
Data Center A										
Building AX										
HVAC										
AHU										
F1-AHU 1	AHU	2/3	0/1	Installation	Commissioning					
F1-AHU 2	AHU			Installation	Commissioning					
F1-AHU 3	AHU			Installation	Commissioning					
Chiller										
CH1	Chiller	3/3		Chiller Before Start	Chiller After Start					
CH2	Chiller	1/1	1/1	Chiller Before Start	Chiller After Start					
Cooling Tower										
CT1	Cooling Tower			CT Commissioning						
CT2	Cooling Tower			HWAC-CT-L2						
CT3	Cooling Tower			CT commissioning						
FCU										

Exto Cx portal

In the Cx portal, users define equipment lists, assign Cx steps, complete forms and checklists, upload documents and photos, and report and track progress and issues across teams.

The Exto scheduling engine defines logic and dependencies between steps and integrates that logic with the project schedule for accurate project schedules with high confidence in Cx durations.

EXTO SUPPORTS ALL PROJECT ROLES

Owners

- Standardize processes across all contractors
- Track projects in real time
- Monitor projects for physical and financial progress

General Contractors

- Monitor daily progress from a single dashboard
- Create and view reports for proactive decision making

Specialty Contractors

- Track and submit issues and hindrances to locate bottlenecks
- Increase ROI on existing tools

EXTO BENEFITS FOR COMMISSIONING

based on industry averages

Reduce employee downtime by up to

14%

Reduce energy costs by up to

13%

Increase real-time project visibility to

100%

About Exto

Exto is a SaaS work-management platform that helps companies navigate the complex project execution landscape. Exto embeds dedicated, experienced project-monitoring resources into large infrastructure project organizations along with world-class technology.

Exto solutions allow teams to focus on project management and execution while adapting to every

project detail for consistently successful outcomes. The Exto team includes construction professionals and engineers with more than 20 years of experience in the field.
